Summary

Full Stack Developer utilizing a background in animation to creatively solve problems. Recent graduate of UCLA Extension Coding Boot Camp and San Francisco State University, now armed with skills in React, JavaScript, HTML, CSS, MongoDB, Node.js, Express, and MySQL. With a positive attitude and a friendly demeanor, I help my team follow through on a project. A member in several MERN application projects, I lend my hand wherever needed to get the job done. I hope to grow as a developer and to be a part of something incredible.

Work Experience

Freelance Web Developer – Laura Cullen Art Remote (January 2021 – April 2021)

- Web Application for a client to display their work and a manager portal for them to update page
 - Established AWS link and created hosting bucket for images for application
 - Deployed code that allowed for displaying/ adding images to the bucket from webpage
 - Live Application : <https://laura-cullen.herokuapp.com/>
 - *GitHub* Repo: <https://github.com/lilipcohen/Laura-Cullen>

Sales Associate – Sunglass Hut San Francisco (October 2017 – November 2018)

- Honed my ability to multitask within an ever-changing workplace,
 - Constantly surpassed my sales quota, leading to better profitability

EDUCATION

- Certificate from UCLA Coding Boot Camp (September 2020 – April 2021)
- **B.A.** in cinema, **Minors** in Animation/ Comic Studies (San Francisco State University 2015-2020)

Projects

Dark Horse

Web Application for a client that connects bands to their fans and allows for fans to vote on where a band should perform next

- Utilized *Leaflet* API to create a custom map to display fan locations
- Combined map with a Geocoding API for dynamic map changes
- Assisted in creating components for the rest of the app
- Live Link: <http://darkhorsetours.herokuapp.com/>
- *GitHub* Repo: <https://github.com/TomaraPetty/Dark-Horse>

React Employee Directory

A React Application that displays current employees (JSON) on a webpage, changing the display whenever the user searches for an employee.

- Learned how to manage state and create a responsive webpage
- Developed components to help contain and build a webpage
- *Github* Repo: https://github.com/Ellisd16/React_Employee_Directory

Employee Management System

A backend application that acts a management portal for an employee database. The user can view, add, and edit employee data.

- Utilized *MySQL* database and queries to manipulate employee data
- Created an *Inquirer* question that activates through *Node.js*
- *Github* Repo: https://github.com/Ellisd16/Employee_Management_System
- *Demo*: <https://youtu.be/Nf-SZQnjOVs>

Job Related Skills

- *Adept*: HTML, CSS, JavaScript, Node.js, jQuery, React, Express,
- *Learning*: C++, Mongo, MySQL, Amazon Web Services, S3 Bucket
- 1 year of experience with management software Asana, Slack, and Zen-hub
